

# EBOLA ESSAY

By

Daniella ████████

The disease Ebola comes from Africa. That doesn't mean African people are bad. That means they are unlucky. Ebola comes from bats. Ebola is scary. Your body is bleeding and you could die from it. You can't hug your loved ones that have it or you will get it.

Most people are catching ebola by trying to help the people sick with ebola. More people are catching it and it spreads the disease. We have to try to help them without catching it, wearing protective suits.

The world would be a better place if there was no ebola. But there is ebola, so be kind to the sick.
